

PolyZone

The answer to upgrading plastic glazing

energy efficiency

PolyZone from Hanita Coatings

The answer to upgrading plastic glazing

Plastic glazing is everywhere. And it's no wonder why: transparent, lightweight and virtually indestructible, plastic glazing makes the perfect substrate for roofing, skylights, walkways and high-traffic public spaces.

Just like glass, polycarbonate or PMMA glazing often requires upgrading — for solar control, for protection against vandalism or from everyday wear and tear.

Hanita Coatings introduces PolyZone, the ideal solution for upgrading plastic glazing. Hanita's industry-leading R&D team has developed a completely new formulation for bubble-free adhesion to glazing, with a unique, clean-removal adhesive that ensures plastic remains in pristine condition. When professionally installed on the exterior of existing polycarbonate or PMMA glazing, PolyZone films protect easily scuffed plastic or dramatically reduce troublesome heat buildup and glare.

Two PolyZone product lines for clear protection and solar control

PolyZone Protect

These clear films safeguard plastic substrates from scratches, discoloration and graffiti.

PolyZone 4 mil Clear Xtra

Keeps polycarbonate and acrylic glazing looking as good as the day it was installed, protecting against:

- Scuffing
- Yellowing
- Premature aging

PolyZone 6 mil Anti-Graffiti Xtra

Stops graphic vandals, with:

- Wipe-clean surface that shrugs off most spray, paint, acid and pen
- Sacrificial film to protect against etching and gouging

PolyZone Sun Control

Two high-performance, transparent silver films reduce glare and heat buildup.

PolyZone Silver 20 Xtra

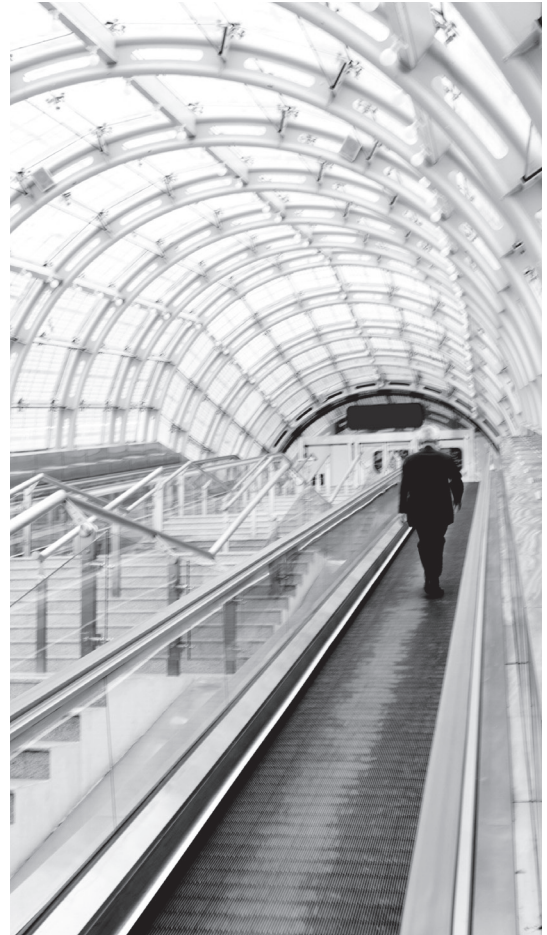

Solar control has been designed especially for vertical or steeply sloped plastic glazing.

- 82% glare reduction for a pleasant, dazzle-free interior
- 99% UV block helps prevent fading and sun damage
- 81% solar energy rejected dramatically reduces heat buildup, cutting cooling costs

PolyZone SkyLite S20X XTRM

Solar control designed for flat, curved and sloped roofing applications gives:

- Exceptional glare, UV and heat reduction
- An outstanding warranty

- From bus shelters to acoustic barriers, PolyZone Protect films safeguard plastic glazing from graffiti, vandalism and everyday wear and tear.
- From malls to walkways, PolyZone Sun Control transparent silver films prevent overheating and reduce glare, transforming sun-drenched areas to livable, workable surroundings.

The PolyZone Advantages

- Bubble-free compatibility with most polycarbonate and PMMA
- Clean removal adhesive won't harm substrate
- Anti-graffiti and scuff protection safeguards expensive substrates
- Exceptional solar control cuts heat and glare and reduces energy costs
- Outstanding warranty
- External application extends substrate lifetime
